Arm Case

Designed to transport and protect the Steadicam arm with maximum practicality on set, the Arm Case features a padded cylindrical structure that combines lightweight construction with reliable protection. Its soft reinforced design helps absorb impacts while keeping the arm secure during transport and storage.

The top opening system allows quick and easy access to the arm, making setup and packing faster during demanding shooting days. Integrated metal attachment points and the dedicated anchoring system allow the case to be securely fixed to a stand while operating, keeping the arm protected, stable, and always within reach on set.

Compact, functional, and built for professional daily use, the Arm Case is designed for operators who need efficiency without compromising protection.

Technical Features

External material: Cordura® 1000D

Internal material: Nylon 210

Premium Italian-made webbing for handles and shoulder straps

Velcro® fastening system

High-quality SBS zipper

Heavy-duty 4 cm metal D-rings

0.5 mm rigid plastic reinforcement

1 cm high-density protective foam padding

Breathable anti-slip Air Space fabric components

Italian-origin anti-slip suede leather handle grips, Green certified

High-strength carabiner

Specifications

Weight: 1.6 kg

External dimensions (LxHxW): XX cm

Internal dimensions (LxHxW): XX cm

Arm Cover

Go to the website >>

Designed to protect the Steadicam arm from rain, dust, and harsh shooting conditions, the Arm Cover combines lightweight waterproof protection with maximum operational flexibility. Its soft construction allows the arm to move freely while maintaining full performance during operation.

The two-piece detachable design ensures unrestricted arm movement and allows fast installation or removal directly on set. Dual side zipper openings provide quick and direct access to the springs for easy adjustment without removing the cover, while the adjustable elastic closures securely seal the ends and improve protection against external elements. Built for professional operators working in demanding outdoor environments where protection, speed, and reliability are essential.

Technical Features

- Waterproof soft-shell construction
- Lightweight flexible design for unrestricted arm movement
- Two-piece detachable structure
- Dual side zipper access for spring adjustment
- Adjustable elastic end closures
- Reinforced stitching for professional use
- Compact foldable design for easy transport
- Velcro® fastening system
- High-quality SBS zipper

Specifications

- Weight: 0,2 kg
- Compatible with all Professional Steadicam arms

Sled Case

Go to the website >>

Designed to transport a fully assembled Steadicam sled without the need for disassembly, the Sled Case combines maximum protection with fast and practical handling on set. Its reinforced lightweight structure provides excellent impact resistance while maintaining comfortable portability during travel and production work.

The interior is engineered to safely secure the sled and essential components, while the rigid padded construction helps protect sensitive equipment during transport.

Inside the case, two adjustable retention straps with durable buckles securely hold the equipment in position, minimizing movement during transport and travel.

Equipped with a padded shoulder strap and integrated backpack shoulder harness, the Sled Case offers multiple carrying configurations for operators constantly moving between locations.

Built for professional Steadicam operators who demand durability, speed, and reliability in every shooting environment.

Technical Features

External material: Cordura® 1000D

Internal material: Nylon 210

Premium Italian-made webbing for handles and shoulder straps

Velcro® fastening system

High-quality SBS zipper

Heavy-duty 4 cm metal D-rings

0.5 mm rigid plastic reinforcement

1 cm high-density protective foam padding

Breathable anti-slip Air Space fabric shoulder straps

Italian-origin anti-slip suede leather handle grips, Green certified

High-strength carabiner

Specifications

Weight: 3 kg

External dimensions (LxHxW): 79x30x45 cm

Internal dimensions (LxHxW): 76x27x42 cm

Stage Cover

Go to the website >>

Designed to provide complete protection for the lower section of the Steadicam sled, the Stage Cover is built for professional operators working in demanding weather and shooting conditions. Its waterproof construction protects sensitive electronics, monitor, and battery area from rain, dust, and environmental exposure while maintaining full usability during operation.

The integrated transparent monitor visor supports displays up to 8 inches, ensuring clear visibility and fast monitoring even in challenging outdoor environments. A dedicated waterproof battery access opening allows quick battery replacement without removing the cover, while the upper Velcro® closure system secures the cover tightly around the sled for improved protection and stability.

Engineered for real production work, the Stage Cover combines weather resistance, functionality, and fast access in a lightweight professional solution.

Technical Features

- Waterproof protective construction
- Transparent visor for monitors up to 8"
- Dedicated waterproof battery access opening
- Velcro® upper closure system
- Dust and rain protection for bottom stage components
- Lightweight flexible structure for unrestricted operation
- Reinforced stitching for professional use
- High-quality SBS zipper
- Compact foldable design for easy transport

Specifications

- Weight: 0,25 kg
- Compatible with all Professional Steadicam bottom stage systems

160,00 €

Steady Wrap

[Go to the website >>](#)

Designed to quickly protect the complete Steadicam setup while resting on the stand between takes, the Steady Wrap shields the rig and mounted camera from rain, dust, and environmental exposure during production downtime. Its lightweight waterproof construction allows fast coverage without the need to remove or disassemble the camera system.

The wrap is engineered to cover the entire rig while maintaining a compact and practical form factor for quick deployment on set. An adjustable elastic tightening system at the bottom secures the cover firmly around the sled and stand area, helping prevent water, dust, and wind from entering while keeping the setup protected and ready for immediate operation.

Built for professional productions where speed, protection, and efficiency are essential on every shooting day.

Technical Features

- Waterproof protective construction
- Full Steadicam and camera coverage
- Adjustable elastic tightening system
- Lightweight quick-deploy design
- Dust and rain protection
- Compact foldable structure for easy transport
- Reinforced stitching for professional use
- Durable weather-resistant materials

Specifications

- Weight: 0,3 kg
- External dimensions (LxHxW): 112x72x28 cm
- Compatible with all Professional Steadicam systems with mounted camera

Vest Case

Designed to safely transport and protect the Steadicam vest, the Vest Case combines durability, comfort, and professional-grade construction in a compact carrying solution. Its reinforced lightweight structure protects the vest from impacts, scratches, and wear during transport while keeping the setup organized and ready for use.

The padded interior is specifically designed to accommodate the vest securely, reducing movement inside the case and improving protection during travel and production work.

Inside the case, two adjustable retention straps with durable buckles securely hold the equipment in position, minimizing movement during transport and travel.

Equipped with a padded shoulder strap and integrated backpack shoulder harness, the Vest Case ensures comfortable carrying in any shooting environment.

Built for professional operators who require reliable protection and efficient mobility on set and during travel.

Volt Cover

Designed to protect the Steadicam Volt system from rain, dust, and harsh shooting environments, the Volt Cover provides reliable protection while maintaining full operational freedom during use. Its lightweight flexible construction allows the rig to move naturally without restricting rotation or operator control.

The cover is specifically engineered to shield the Volt unit and surrounding sensitive components while leaving the front section accessible and unobstructed for proper operation and visibility on set. Built for demanding outdoor productions, the Volt Cover combines durability, functionality, and fast installation in a compact professional solution.

Technical Features

External material: Cordura® 1000D

Internal material: Nylon 210

Weather-resistant construction

Lightweight flexible structure for unrestricted movement

Velcro® fastening system

High-quality SBS zipper
